

Kits Available from Fun with Soap – Please refer to our price list

For your convenience, we have added the list of ingredients per kit. When labelling your goodies always add any other ingredients you add, e.g. preservatives or fragrances etc.

Hand & Body Lotion

Makes 2 Litres
(depends on how thick you would like it)

Have 1.9 Litres hot water ready. (deionised is best)
Gently melt the Premix mix and emulsifying wax together in a pot over the stove...low heat
(use a glass or stainless steel pot...never aluminium pots.)
Combine the hot water and butter mix in a big bowl.
Start blending immediately. Blend until cooled.
You dont have to blend all the time. So have rests inbetween.
Optional: Add liquid soap dye for colour and fragrance as desired.
Optional - Add preservative - kemaben

Dont forget...you can adjust amount of water to obtain your own desired viscosity. Hand & Body lotion
Generally a thinner viscosity.

Note ..water, kemaben, fragrances, dyes not included in kit

The image is a recipe card for Hand & Body Lotion. It features a light purple and pink background with decorative elements like a kitchen sink, a bowl of clouds, and a small illustration of a person. The text is written in a cursive, italicized font. There are small icons of a hand being washed and a glass of water.
